

# How to Download the PulsePoint Respond App

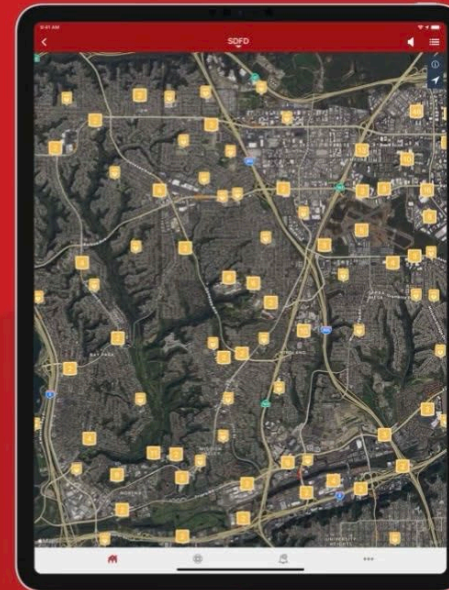

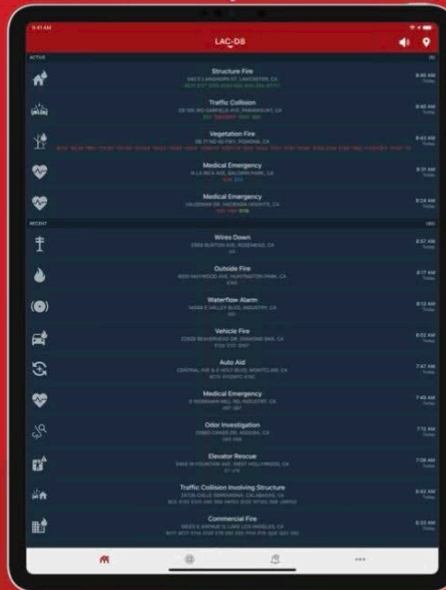

# Step 1 – From your mobile device, go to the App Store (ios) or Google Play (android) and search for PulsePoint Respond and click to Add

**PulsePoint Respond**  
Building informed communities  
★★★★★ 133K

GET

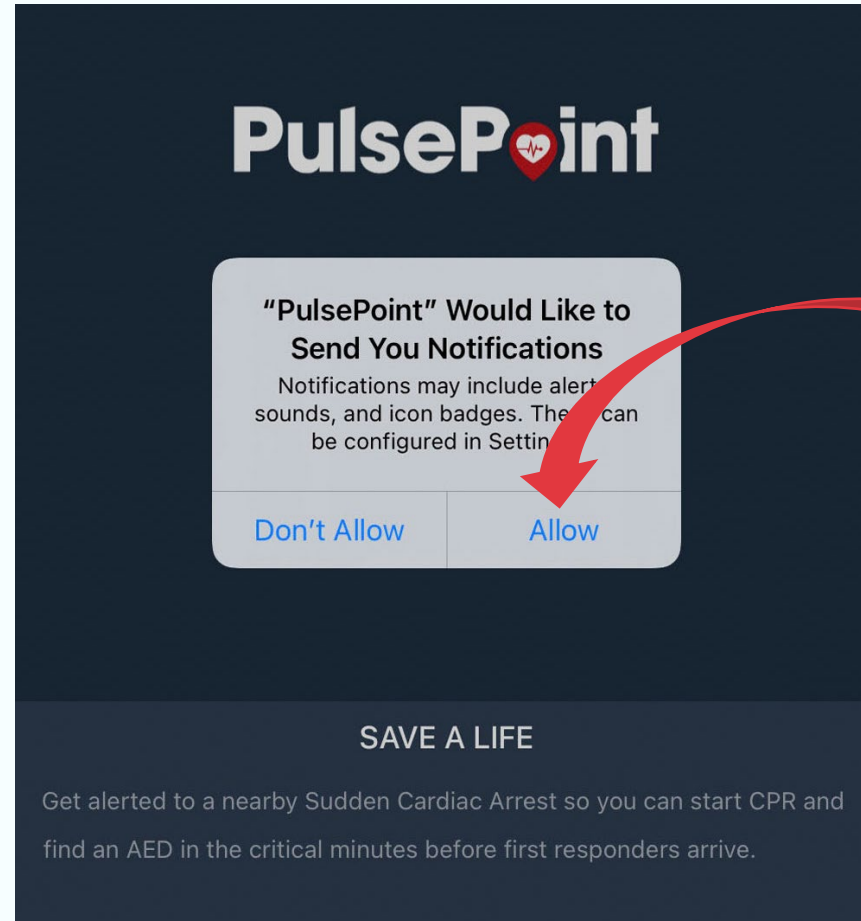

Stay informed of local emergency activity in real time.

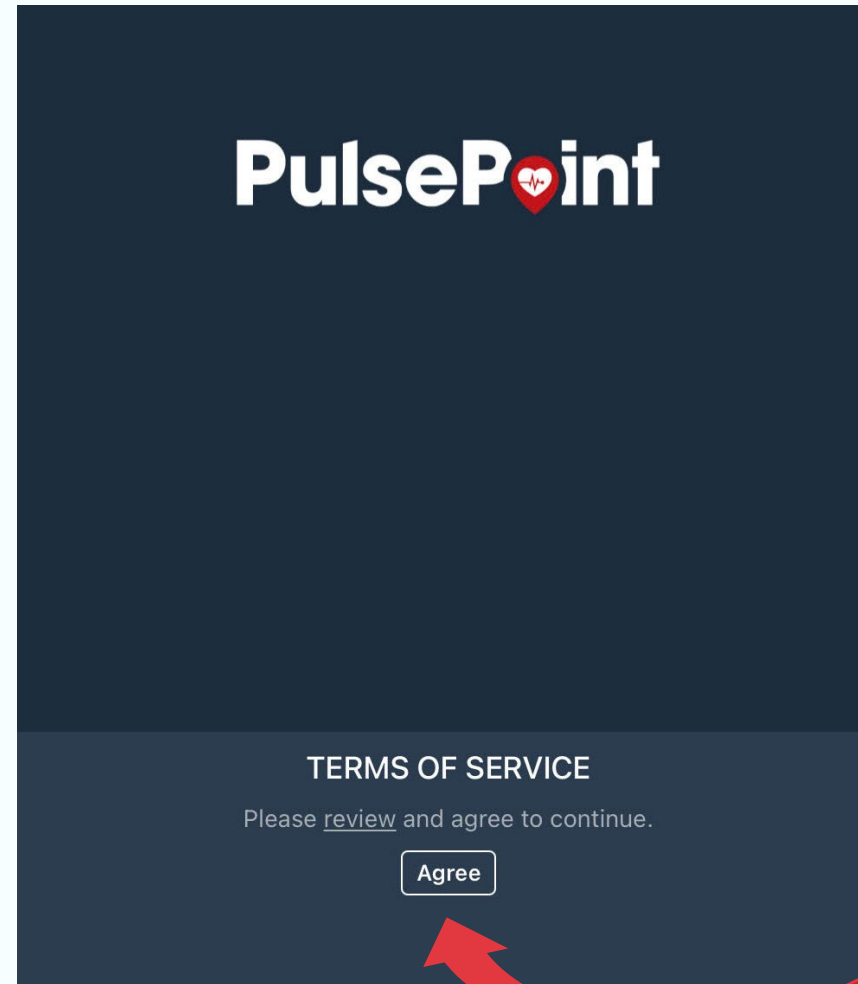

Precise location of every AED plus colocated bleeding control kits, epinephrine and naloxone.

[www.iowaheartsafe.org](http://www.iowaheartsafe.org)

## Step 2 – Click to “Allow Notifications”

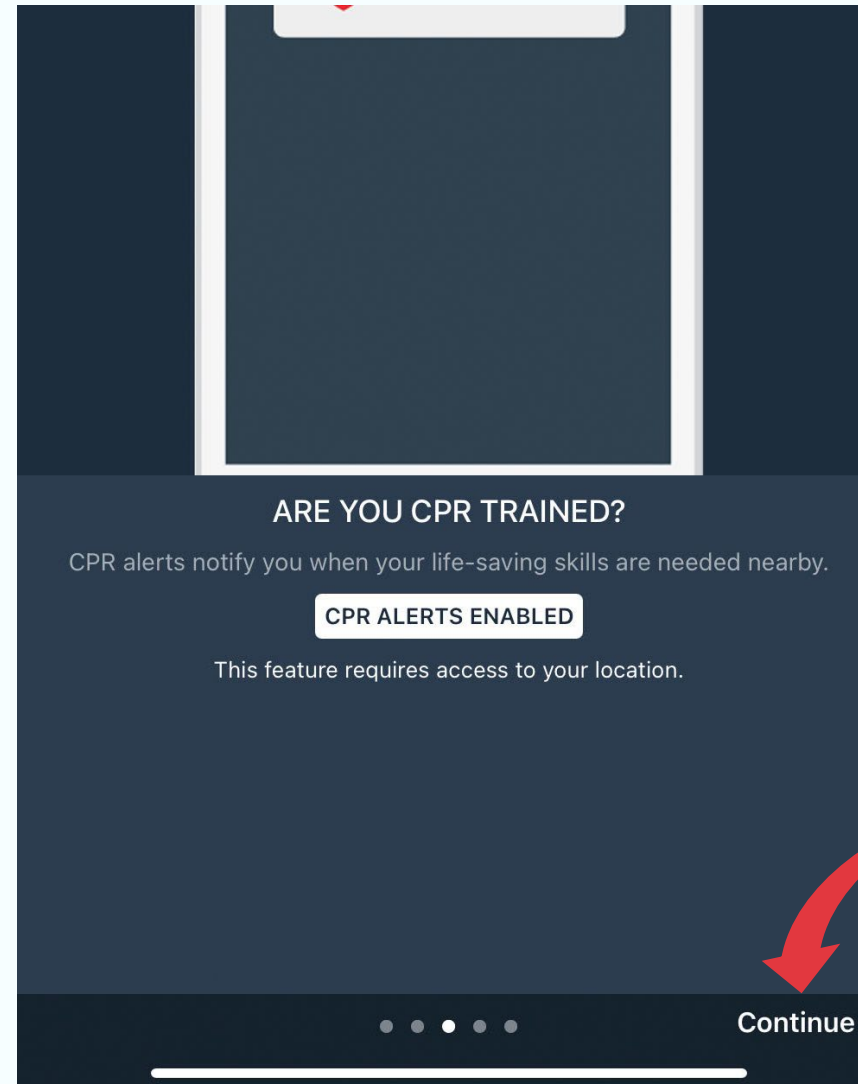

## Step 3 – Click to “Agree” to Terms of Service

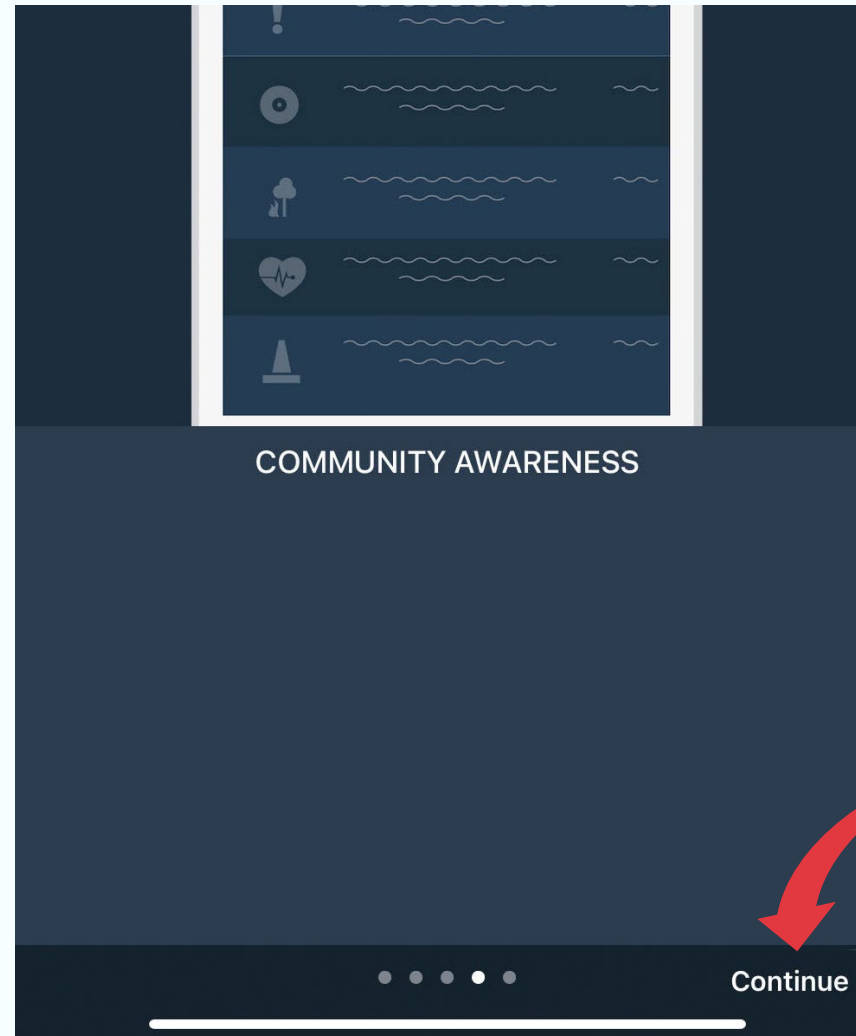

[www.iowaheartsafe.org](http://www.iowaheartsafe.org)

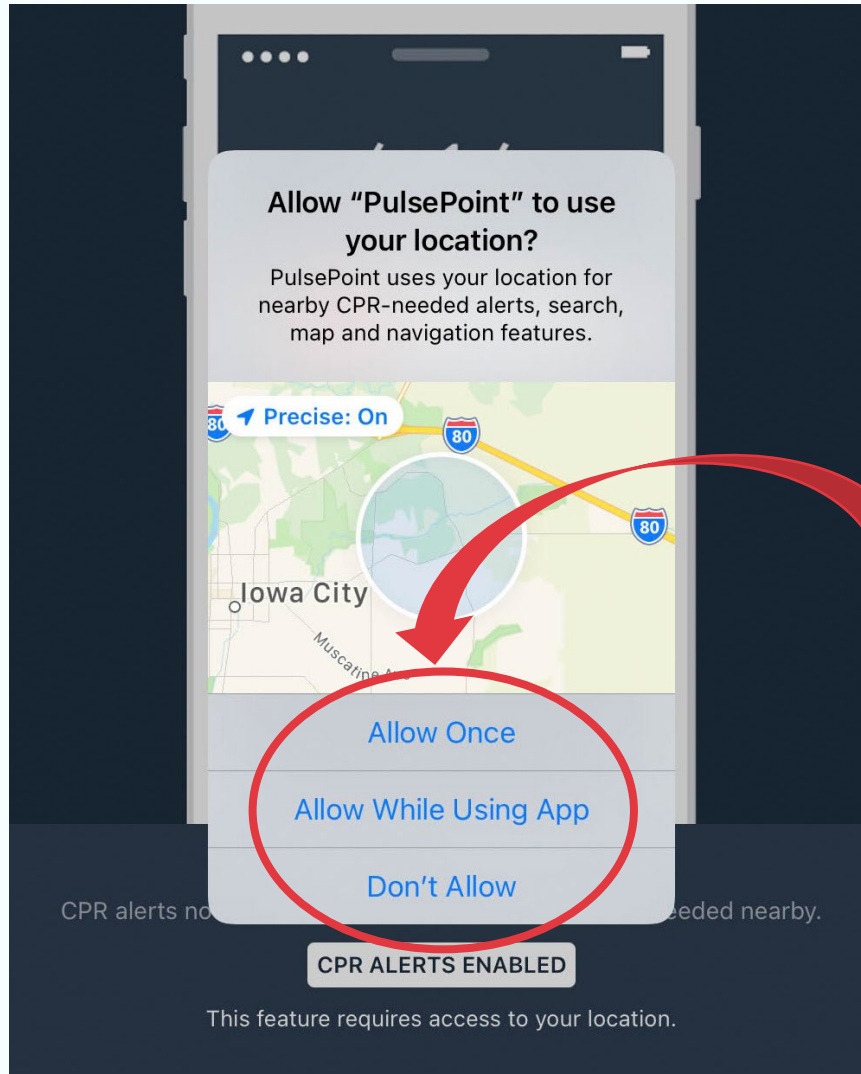

## Step 4 – Click "Continue" to Allow CPR Alerts

## Step 5 – Click "Continue" through informational screens

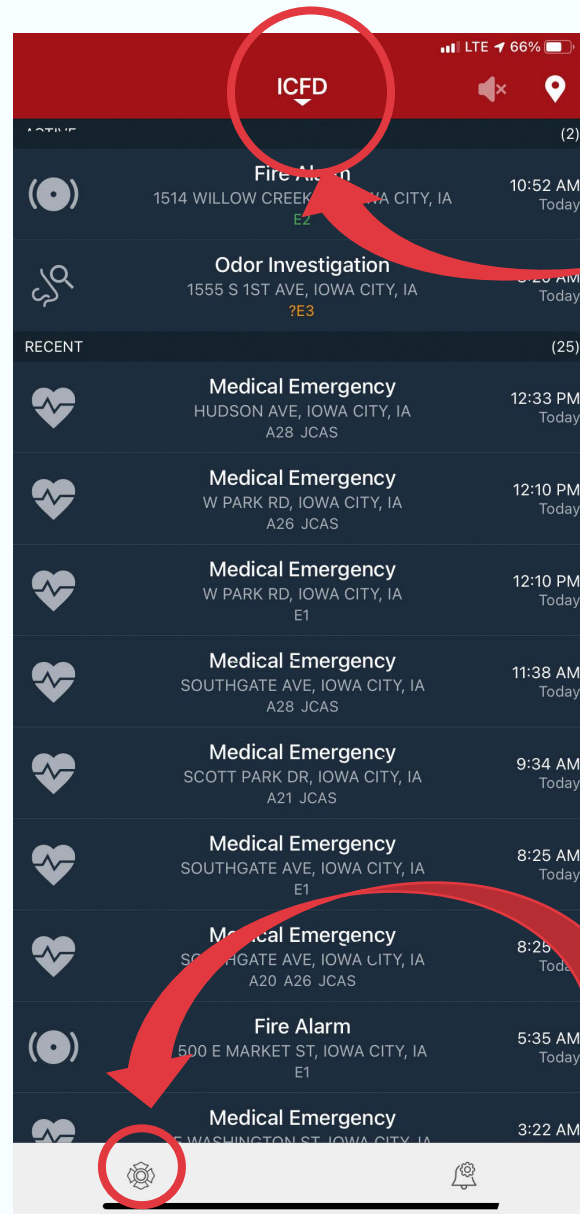

## Step 6 – Click Either of the “Allow” options

PulsePoint will ask you later to “Always” allow to use your location. **Enable “Always”** so that PulsePoint can alert you for medical emergencies near your location.

You can also edit this in your Settings...PulsePoint...Location.

## Step 7 – Choose Agencies to Follow (optional)

e.g. Iowa City Fire Department

Click on Agency icon (Maltese cross) in lower left to choose from list of Agencies near you to follow. You can view all events for that agency.

Regardless of which agencies you follow, you will receive CPR alerts wherever you are located.
